

Boeing B737-600/700/800/900 (CFM56-7) B2 Theoretical Type Course

Electrical and Avionic Systems – ATA Spec 104, Level 3
Airframe & Powerplant Systems – ATA Spec 104, Level 2

- Duration:** 21 Days
- Target Group:** Part-66 Category B2 Engineers or other Maintenance staff
- Language:** English. Student must have the ability to read, write and communicate at a functional level in the English language
- Course Location:** FlightPath International Training Centre in Toronto, Canada or at customer site
- Description:** This EASA approved course is compliant with EASA Commission Regulation (EC) No 1321/2014. This course provides theoretical ATA Spec 104, Level 3 knowledge for all Electrical and Avionic systems and ATA Spec 104, Level 2 knowledge for Airframe and Powerplant systems. The course includes system description and operation, any unique maintenance practices, test procedures and noteworthy adjustments along with component location required by Part-66 certifying staff
- General:** Examinations are closed book multiple choice format with a passing grade of 75% and will be conducted throughout the course. Students will receive an **EASA Part-147 Theoretical Certificate of Recognition** upon successful completion of the course

Boeing B737-600/700/800/900 (CFM56-7) B2 Practical Course

Electrical and Avionic Systems – ATA Spec 104, Level 3
Airframe & Powerplant Systems – ATA Spec 104, Level 2

- Duration:** 7 Days
- Target Group:** Part-66 Category B2 Engineers or other Maintenance staff
- Language:** English. Student must have the ability to read, write and communicate at a functional level in the English language
- Course Location:** FPI Practical Training locations or customer site
- Prerequisite:** Maintenance staff must have completed the theoretical training of the aircraft type
- Description:** This EASA approved course is compliant with EASA Commission (EC) No 1321/2014. This course provides practical experiences and competencies to troubleshoot and perform maintenance tasks. Engineers will work with various aircraft manuals and other documentation to ensure the safe performance of maintenance, inspections and routine work. The Engineer will obtain the knowledge and skills required to perform the tasks correctly using special tools and/or equipment as required and will be knowledgeable in the correct use of technical literature and documentation
- General:** Practical assessment must be completed successfully as well as successful completion of the Practical Checklist as per requirements. Students will receive an **EASA Part-147 Practical Certificate of Recognition** upon successful completion of the course
